

2/2/70

Dear Paul,

I've gone over the notes on the add to Ch 18 in the NCR copy and will post on the master. I didn't want to handle it tonight and won't until my wife is ready to type. However, I think we'd found only one of the errors you did.

Our standard agrees with you on "cancellation", but because the single l is also acceptable, we probably will not take the time to retype the rest, as it would have to be for space reasons.

On "Boole's resignation, the electronic media and papers made it appear that his resignation was over the Panther incident. From the Washington Post story there would seem to be no doubt. Nor did DJ protest that. I do not dispute you. I do not know. I used the press only. It is also possible that while he was expected to leave the post, this is what brought it to a head.

525: there was no warrant at all on the first, the FBI raid, that is in the book proper. The total lack of any warrant seized my mind and told me JEH was up to something, that if this stayed down, there'd be a more bitter dose.

526: I do not now recall what reason was given for the cancellation of the trip. It may have been in Schlesinger, or it may have been in the small news stories in that part of the book, quoting the cops who quoted SS. I believe it was not until later that the reason became known. Also, the finding was withdrawn and a year later, 1965, the decision was changed to not guilty. But it was not until a year later, not 1964.

If only there were a limitless number of pages and limitless fund with which to print. JEH is the entire front cover of the GLKSmita sheet this month and his attack on the students/blacks the entire story contents, only two editorials and the regular departments getting any space. That and the Texas non-investigation of inmates, known to have threatened the Pres, are lovely.

If you make any comment on the Bishop notes, please send me an extra carbob. I think I'll get Howard to ask him the questions. He is bright and very young. He had a fantastic interview with Specter, who saw him then lost his cool, and with a pathologist about which I can here say nothing.

Many thanks,

HW
